

painless::WorkingResult

result

painless::WorkingStrategy

parent

```
graph BT; WS[painless::WorkingStrategy] -.->|result| WR[painless::WorkingResult]; WS -.->|parent| WS;
```

The diagram illustrates two relationships involving the `painless::WorkingStrategy` class. First, a dashed purple arrow points from `painless::WorkingStrategy` to `painless::WorkingResult`, labeled `result`, indicating that the strategy returns a working result. Second, a dashed purple arrow points from `painless::WorkingStrategy` to itself, labeled `parent`, indicating a recursive or self-referencing relationship.
