

painless::WorkingResult

result

painless::WorkingStrategy

parent

```
graph BT; WS[painless::WorkingStrategy] -- result --> WR[painless::WorkingResult];
```

The diagram illustrates a return relationship between two classes. At the top is a box labeled 'painless::WorkingResult'. At the bottom is a box labeled 'painless::WorkingStrategy', which is shaded gray. A dashed purple arrow points from the 'painless::WorkingStrategy' box up to the 'painless::WorkingResult' box. The arrow is labeled 'result' in the middle. To the right of the 'painless::WorkingStrategy' box, there is a purple arrow pointing towards it, labeled 'parent'.
